Profile

I am a Django Web Developer and Python Programmer.

Skills

- Django Web Framework/ Python
- C++
- General Programing Logic

Projects

- Simple Message Board (Django/Python)
  - This was a simple message board that allowed users to post messages to a public board, it also allows users to favorite posts and view those posts later.

- Craigslist style site (Django/Python, HTML/CSS)
  - A site for connecting buyers and sellers of wormholes in the the game EVE Online, members could post listings of wormholes for sale and could be contacted by users who wanted to buy. I did mostly front end development on this project.

- Movie Selector (Django/Python, HTML/CSS)
  - A site to solve the question of "what movie should we watch tonight?". Users can make lists of movies they would like to watch and then select a group to watch a movie with. The movie is picked by tallying everyones choices and selecting the movie with the most votes.

- Recipe (Django/Python, HTML/CSS)
  - This is a Recipe storage webpage. It's core feature is to scale any recipe based on how many servings you need to make. It also searches recipes based on ingredients you want to use.

Experience

CODING CAMPUS – 2015
